

ABSTRACT OF THE DISCLOSURE

5 Converting document formatted for use on servers to and from documents
formatted for use on small devices, including synchronizing two or more versions of the
document. A user may edit documents formatted for use on small devices and the
documents may be synchronized with documents on the server to keep the documents up
to date. In one embodiment, an n-way merge process may restore document formatting,
10 styles and/or data features that may have been lost from one or more documents when
converting from an office format to a small device format. In one embodiment, the server
may provide an office productivity environment, and the documents on the server may be
office documents.
